

## FREQUENTLY ASKED QUESTIONS

- **What is the difference between Refinishing and Reglazing?**

There is no difference. Both refer to a process of applying a new coating over an existing surface.

- **How long will a refinished bathtub and tile wall last?**

A refinished bathtub or tile wall can easily last 10-15 years with proper care and maintenance.

- **Are Refinished Bathtubs durable?**

Premier Surface Refinishing uses Glas-Tech 9000 refinishing systems which are designed to perform with daily use. Glas-Tech exceeds industry standards and is designed specifically for porcelain and fiberglass applications.

- **Do refinished Bathtubs look “painted”?**

Definitely not! The finished product is applied with an HVLP (sprayed on) Air system.

- **How much time does it take to refinish a bathtub?**

The average job takes between 4 and 5 hours to complete.

- **How long before I can use a newly refinished bathtub?**

Please allow the finish to cure for 24 hours prior to using.

- **What colors are available?**

We carry colors from American Standard, Kohler, and others. Just ask for a sample

- **Can I have a custom Color?**

Most definitely, Premier will match your existing fixture color for a nominal fee. Standard colors include, white, bone, and biscuit.

- **Will there be an odor during the process?**

Our coatings contain solvents which are required for a hard and durable finish. We will use a ventilation system to exhaust most of the odor from the work area to the outdoors. If you have sensitivities to odors, you may want to leave the area for a few hours. The fresh paint odor will dissipate within hours after completion of work.

- **Does a refinished bathtub require special care?**

No, aftercare is simple. Non-Abrasive cleaners should be used to avoid scratching your newly refinished surface. Would you use a hard abrasive cleaner on your newly repainted vehicle? Our warranty instructions will provide you with information on proper care and maintenance.

- **How much does it cost to refinish a bathtub?**

The price for refinishing varies depending on several factors. Has the tub ever been refinished in the past? Is the tub peeling or chipped? The average price ranges somewhere between \$350 and \$500.

Premier Surface Refinishing is a non-franchise company, we are locally owned and operated. The owner performs all work.
